Curtains?: The Future of the Arts in America: Kaiser ...

In his new book, Curtains? The Future of the Arts in America (Waltham, MA: Brandeis University Press, 2015), Kaiser paints a dark picture of the future, both explaining how things came to pass and what arts organizations, especially mid-sized ones, might do to (maybe) save themselves from oblivion.

Curtain up for Inverness Film Festival. by John ... The Scottish Government has been urged to 'pick up the phone' to Westminster and ask for support to secure the future of Burntisland ...

In this clear-minded but sobering book, Michael M. Kaiser assesses the current state of arts institutions-orchestras; opera, ballet, modern dance, and theater companies; and even museums. According to Kaiser, new developments in the twenty-first century, including the Internet explosion, the death of the recording industry, the near-death of subscriptions, economic instability, the focus on STEM education in schools, the introduction of movie-theater opera, the erosion of newspapers, the threat to serious arts criticism, and the aging of the donor base have together created tremendous challenges for all arts organizations. Using Michael Porter's model of industry structure to describe how industries evolve, Kaiser argues persuasively that unless steps are taken now, midsized performing arts institutions will have all but evaporated by 2035. Only the largest arts organizations will survive, with tickets priced for the very wealthy and programming limited to the most popular and lucrative productions. Kaiser concludes with a call to arms. With three extraordinary decades' experience as an arts administrator behind him, he advocates passionately for risk-taking in programming and more creative marketing, and details what needs to happen now-building strong donor bases, creating effective boards, and collective action-to sustain the performing arts for generations to come.

At forty-four, Tom Jokinen decided to quit his job in order to become an apprentice undertaker, setting out to ask the questions: What is the right thing to do when someone dies? With the marketplace offering new options (go green, go anti-corporate, go Disney, be packed into an artificial reef and dropped in the Atlantic...), is there still room for tradition? In a year of adventures both hair-raising and hilarious, Jokinen finds a world that is radically changed since Jessica Mitford revised The American Way of Death, more surprising than Six Feet Under, and even funnier and more illuminating than Stiff. If Bill Bryson were to apprentice at a funeral home, searching for the meaning of life and death, you'd have Curtains.

Practical advice and step-by-step instructions for window dressing. Suitable for both beginners and experienced curtain-makersStunning designs and inspiration for every room in your home Making curtains needn't be left to the professionals - with Easy to Make! Curtains and Blinds you, too, can create stylish window dressings for your home.Packed with all the basic know-how you need, Easy to Make! With information on hanging and accessories you'll be armed with everything you need to know to dress your windows with confidence.

First published in 1999, this book examines the construction of new political, economic and mental borders in post-Cold War Europe. Various national and regional settings are analyzed along the old East-West divide. In post-Cold War Europe the East-West divide no longer exists in the form of the clear-cut Iron Curtain, separating two security blocs, two politico-economic systems, and two ideologically and culturally distinct worlds. Still, it remains clearly discernible, both in the form of unrelenting politico-cultural differences and as an economic Golden Curtain. At the same time, a more complicated system of intersecting political, economic and mental borders keeps developing. Today, there are various scales of interaction, which produce distinctive national, regional and local experiences of borders. In this book, the construction of new political, economic and mental borders is analysed by specialists from both sides of the former East-West divide. The future of European borders is discussed in various national and regional settings, from the Barents Region in the North to the Old Habsburgian lands in Mitteleuropa!.

Things are not always what they seem to be, but with wisdom like Solomon of long ago; Sir Lynden O. Pindling the great and awesome patriot drew back the curtains and opens the windows of progressive growth and crushed the myth of the islands of the Bahamas as beholding to the monarchy seeing the natives as "subjects" any more. With the dawn of daylight came a new hope of freedom and equality for all as the dark days of colonial rule for the beloved chain of islands was sunk into the ocean where never again Bahamians would be labelled "subjects" nor would "God save the Queen" would have to be sung by the people, as "Behind Grey Curtains" surfaced a new anthem begun; "Lift up your head to the rising sun, Bahama-land; March on to glory, your bright banners waving high. See how the world marks the manner of your bearing! Pledge to excel through love and unity. Pressing onward, march together to a common loftier goal; Steady sun ward, tho' the weather hide the wide and treacherous shoal. Lift up your head to the rising sun, Bahama land, 'Til the road you've trod lead unto your God, MARCH ON, BAHAMA LAND" Timothy Gibson Tasting freedom Bahamians quickly and judiciously governed while directing the destiny of the nation with dignity and honor. Meanwhile the aspirations of many people who had exhibited loyalty and maturity earlier for the independent country was being dissected and the true history of the people was in doubt; "Behind Grey Curtains" thrived to tell the story of how to restore admirably order and cohesive community endeavors for the long haul while bringing about domestic tranquility among the people and giving a face of the trials and issues associated with the developing history.

"Behind the Curtains of Joy" is a book that embodies the struggle of the depressed, through which we get closer to some of their pains and needs, reveal some of their precious treasures, and help others understand the horrible sufferings of the depressed, and how the sound of their silence is loudly voiced out every day. In fact, depression is the worst diseases of the world, and the most painful and complicated one that it killed more humans than wars. Scholars and philosophers exerted much effort to define depression, however, it remained a disease difficult to understand and manage. Some define it as: a mere manifestation of a sense of helplessness toward achievement of goals, in which case despair is attributed to personal anguishs. In this context, hope is seen as a function for recognizing the likelihood of success in terms of its relevance to achieving goals. Others described it as a mental illness characterized by a deep and lasting feeling of sadness, despair, or loss of interest in things that were once a source of joy, accompanied by a sleep, appetite for food, and mental processes disorder. Other scholars confine it to a state of despair, hopelessness, and fear, accompanied by negative thoughts, and changes in the ecosystem of motivation, or in the driving forces of man, in the perceptions, and in the negative behavior in general. Many others got closer to what depression is by defining it as "a state of ongoing severe sadness caused by sad painful conditions, representing something missing, though the patient seems to be unaware of the real source of his/her sadness". However, other scholars defined depression as: "a case of psychological imbalance, which primarily affects the person's mood and ideals, thus exposing him/her to moral pain and distress". It thus becomes clear that there are many definitions and explanations put forward by many scholars and philosophers who are affiliated to study of Medicine, Psychology, and Sociology. However, the most accurate and correct definition of depression from my point of view is: "that feeling only depressed people experience." Yes, this only is the definition of depression. Simply, in order for someone to be able to define depression the way it should be defined, s/he must first experience it so s/he can fairly describe it, which is something I do not wish for anyone.

The Gap in the Curtain John Buchan is remembered for his spy thrillers like "The 39 Steps" but he also wrote tales of the supernatural. Whether The Gap in the Curtain is a supernatural tale, or science fiction, or horror, is difficult to say. A brilliant but possibly slightly unbalanced scientist discovers a means of lifting the curtain for a moment and gaining a glimpse of the future. This discovery allows six guests in his country house to see, for a brief instant of time, a page from a newspaper from one year in the future. The book then follows the life of each of the six people up to that date a year in the future, and examines the way they deal with the knowledge they have gained. The trick to it is that what they each see is an isolated fact, taken out of context. It can enlighten, but it can just as easily mislead. They know one thing that is going to happen, but they don't know how and why it will happen. The knowledge turns out to be surprisingly dangerous.

When I walk behind blue curtains I hear some say We are just actors in the big play each with our role It is like a theatre in full play. I then say welcome behind the blue curtain! As you can hear the music play and the pretty girls sing The show is on! One should just open eyes and ears and enjoy the show As the curtain go because many things is behind it you just Need to find it. You will get it straight from the heart and I hope you were The one who liked it when the curtain falled and it is the Hope you will be standing at your seat in the finale. When the curtains fall and the lights go off I hope you Leave with one more dream to dream and some more light To see and some more emotion to feel.

Planning today is more important than ever. Both acquisition and allocation of resources are increasingly difficult for arts organizations as a result of emerging technologies, reduced arts education, aging donors, and the advent of new forms of entertainment. It is essential for arts organizations to take a coherent approach to these issues to remain vibrant over time. In fact, most arts organizations do periodically attempt some kind of planning exercise. But a review of hundreds of such plans suggests that most contain merely a wish list, rather than concrete plans for the future: "We will increase ticket sales!" is a common "strategy" expressed in too many arts plans. In the absence of details about how ticket sales will be increased, it's an empty promise. In Strategic Planning in the Arts, Michael M. Kaiser, the former head of the Kennedy Center in Washington, DC, and an arts management guru, has produced a clear, concise guide for staff or board members of not-for-profit arts organizations who are responsible for developing, evaluating, or implementing plans. Relying on real-world cases and examples, Kaiser shows how to conceive, assess, and act on every part of the strategic plan, from the mission statement to the financial statement; from managing the board to marketing. Praise for Michael Kaiser: "A rich yet tidy cornucopia of solutions for the challenges facing the American arts scene." - Washington Post

First published in 1999, this book examines the construction of new political, economic and mental borders in post-Cold War Europe.
