Dominick Salvatore once again offers you an opportunity to provide an international perspective to your managerial economics course in his latest edition of the popular Managerial Economics in a Global Economy. Salvatore unifies the theme of managerial decision making around the theory of the firm. This edition offers 28 new case studies and several new chapters that will allow you to present the most current and exciting coverage available in a managerial economics text.

Baye's Managerial Economics and Business Strategy is one of the best-selling managerial economics textbooks. It is the first textbook to blend tools from intermediate microeconomics, game theory, and industrial organization for a managerial economics text. Baye is known for its balanced coverage of traditional and modern topics, and the fourth edition continues to offer the diverse managerial economics marketplace a flexible and up-to-date textbook. Baye offers coverage of frontier research in his new chapter on advanced topics. The Fourth Edition also offers completely new problem material, data, and much more.

Managerial economics, meaning the application of economic methods in the managerial decision-making process, is a fundamental part of any business or management course. This textbook covers all the main aspects of managerial economics: the theory of the firm; demand theory and estimation; production and cost theory and estimation; market structure and pricing; game theory; investment analysis and government policy. It includes numerous and extensive case studies, as well as review questions and problem-solving sections at the end of each chapter. Nick Wilkinson adopts a user-friendly problem-solving approach which takes the reader in gradual steps from simple problems through increasingly difficult material to complex case studies, providing an understanding of how the relevant principles can be applied to real-life situations involving managerial decision-making. This book will be invaluable to business and economics students at both undergraduate and graduate levels who have a basic training in calculus and quantitative methods.
