Pulse Circuits - Signal - A Signal not only carries information but it also represents the condition of the circuit. The functioning of any circuit can be studied by the signal it produces.

~~Pulse Circuits - Signal - Tutorialspoint~~

The reflected radar energy is detected by radar pulse receivers which use both pulse and digital circuits together. The pulse and digital circuits in radar pulse receivers are used to show the location and distance of objects which have reflected the radar transmitter's high powered pulses.

A digital circuit is used to alter the waves into pulse waves. It measures a waveform thousand of times every second and stores the data in binary form. For instance, after 12msecs, a signal might be 2.4 volts high & after 14msecs, it might be at 2.6 volts.
