As Federici reveals, behind the capitalist organization of work and the contradictions inherent in "alienated labor" is an explosive ground zero for revolutionary practice upon which are decided the daily realities of our collective reproduction. Beginning with Federici's organizational work in the Wages for Housework movement, the essays collected here unravel the power and politics of wide but related issues including the international restructuring of reproductive work and its effects on the sexual division of labor, the globalization of care work and sex work, the crisis of elder care, the development of affective labor, and the politics of the commons. This new and expanded edition contains two previously unpublished essays by the author.

More than ever, [the body] is today at the center of radical and institutional politics. Feminist, antiracist, trans, ecological movements—all look at the body in its manifold manifestations as a ground of confrontation with the state and a vehicle for transformative social practices. Concurrently, the body has become a signifier for the reproduction crisis the neoliberal turn in capitalist development has generated and for the international surge in institutional repression and public violence. In *Beyond the Periphery of the Skin*, lifelong activist and best-selling author Silvia Federici examines these complex processes, placing them in the context of the history of the capitalist transformation of the body into a work-machine, expanding on one of the main subjects of her first book, *Caliban and the Witch*. Building on three groundbreaking lectures that she delivered in San Francisco in 2015, Federici surveys the new paradigms that today govern how the body is conceived in the collective radical imagination, as well as the new disciplinary regimes state and capital are deploying in response to mounting revolt against the daily attacks on our everyday reproduction. In this process she confronts some of the most important questions for contemporary radical political projects. What does [the body] mean, today, as a category of social/political action? What are the processes by which it is constituted? How do we dismantle the tools by which our bodies have been [enclosed] and collectively reclaim our capacity to govern them?

Compilation of documents and texts from The New York Wages for Housework Committee 1972-1977 and from other branches of the Wages for Housework movement.

Silvia Federici is one of the most important contemporary theorists of capitalism and feminist movements. In this collection of her work spanning over twenty years, she provides a detailed history and critique of the politics of the commons from a feminist perspective. In her clear and combative voice, Federici provides readers with an analysis of some of the key issues and debates in contemporary thinking on this subject. Drawing on rich historical research, she maps the connections between the previous forms of enclosure that occurred with the birth of capitalism and the destruction of the commons and the [new enclosures] at the heart of the present phase of global capitalist accumulation. Considering the commons from a feminist perspective, this collection centers on women and reproductive work as crucial to both our economic survival and the construction of a world free from the hierarchies and divisions capital has planted in the body of the world proletariat. Federici is clear that the commons should not be understood as happy islands in a sea of exploitative relations but rather autonomous spaces from which to challenge the existing capitalist organization of life and labor.

At a time when socialism is entering a historic crisis and we are witnessing a worldwide expansion of capitalist relations, a feminist rethinking of Marx's work is vitally important. In *Patriarchy of the Wage*, Silvia Federici, best-selling author and the most important Marxist feminist of our time, asks why Marx and the Marxist tradition were so crucial in their denunciation of capitalism's exploitation of human labor and blind to women's work and struggle on the terrain of social reproduction. Why was Marx unable to anticipate the profound transformations in the proletarian family that took place at the turn of the nineteenth century creating a new patriarchal regime? In this fiery collection of penetrating essays published here for the first time, Federici carefully examines these questions and in the process has provided an expansive redefinition of work, class, and class-gender relations. Seeking to delineate the specific character of capitalist "patriarchalism," this magnificently original approach also highlights Marx's and the Marxist tradition's problematic view of industrial production and the State in the struggle for human liberation. Federici's lucid argument that most reproductive work is irreducible to automation is a powerful reminder of the poverty of the revolutionary imagination that consigns to the world of machines the creation of the material conditions for a communist society. *Patriarchy of the Wage* does more than just redefine classical Marxism; it is an explosive call for a new kind of communism.

"We are witnessing a new surge of interpersonal and institutional violence against women, including new witch hunts. This surge of violence has occurred alongside an expansion of capitalist social relations. In this new work that revisits some of the main themes of *Caliban and the Witch*, Silvia Federici examines the root causes of these developments and outlines the consequences for the women affected and their communities. She argues that, no less than the witch hunts in sixteenth- and seventeenth-century Europe and the "New World," this new war on women is a structural element of the new forms of capitalist accumulation. These processes are founded on the destruction of people's most basic means of reproduction. Like at the dawn of capitalism, what we discover behind today's violence against women are processes of enclosure, land dispossession, and the remolding of women's reproductive activities and subjectivity. As well as an investigation into the causes of this new violence, the book is also a feminist call to arms. Federici's work provides new ways of understanding the methods in which women are resisting victimization and offers a powerful reminder that reconstructing the memory of the past is crucial for the struggles of the present."

Literary Nonfiction. CALIBAN AND THE WITCH is a history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages to the witch-hunts and the rise of mechanical philosophy, Federici investigates the capitalist rationalization of social reproduction. She shows how the battle against the rebel body and the conflict between body and mind are essential conditions for the development of labor power and self-ownership, two central principles of modern social organization. "It is both a passionate work of memory recovered and a hammer of humanity's agenda." Peter Linebaugh, author of *The London Hanged*"

An unprecedented collection of feminist voices from four millennia of global history Throughout written history and across the world, women have protested the restrictions of gender and the limitations placed on women's bodies and women's lives. People!of any and no gender!have protested and theorized, penned manifestos and written poetry and songs, testified and lobbied, gone on strike and fomented revolution, quietly demanded that there is an "I" and loudly proclaimed that there is a "we." The Book of Feminism chronicles this history of defiance and tracks it around the world as it develops into a multivocal and unabashed force. Global in scope, The Book of Feminism shows the breadth of feminist protest and of feminist thinking, moving through the female poets of China's Tang Dynasty and accounts of indigenous women in the Caribbean resisting Columbus's expedition, British suffragists militating for the vote and the revolutionary petroleuses of the 1848 Paris Commune, the first century Trung sisters who fought for the independence of Nam Viet to women in 1980s Botswana fighting for equal protection under the law, from the erotica of the 6th century and the 19th century to radical queer politics in the 20th and 21st. The Book of Feminism is a weapon, a force, a lyrical cry, and an ongoing threat to misogyny everywhere.

This book advances debates over the relationship between care and economy through the concept of intimate labor!care, domestic, and sex work!and thus charts relations of race, class, gender, sexuality, and citizenship in the context of global economic transformations.
