EAU Guidelines: Testicular Cancer | Uroweb

It is recommended that all centres use standardised protocols for follow-up of Stage I testicular cancer which are based on the expected frequency, timing and pattern of disease recurrence; and minimise unnecessary radiation exposure. Other surveillance protocols which are also based on similar principles are appropriate.

ANZUP - Surveillance Recommendations

Most testicular cancers can be found at an early stage, when they're small and haven't spread. In some men, early testicular cancers cause symptoms that lead them to seek medical attention. Most of the time a lump on the testicle is the first symptom, or the testicle might be swollen or larger than normal.
