Edition: Unleashing ...~~

The Biology of Belief explores how cells receive and process information. implications of this research radically change our understanding of life, showing that genes and DNA do not control our biology; instead, DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. For decades, genetic determinism—that is, the idea that our genes are fixed, immutable, and outside of our conscious control -- was the prevailing ...

“Bruce Lipton’s delightfully written The Biology of Belief is a much needed antidote to the ‘bottom-up’ materialism of today’s society. The idea that DNA encodes all of life’s development is being successfully employed in genetic engineering. At the same time, the shortfall of this approach is becoming evident. The
