A family, separated by duty and distance, waits for a loved one to return home in this lyrical picture book celebrating the bonds of a Cherokee family and the bravery of history-making women pilots. At the mountain's base sits a cabin under an old hickory tree. And in that cabin lives a family -- loving, weaving, cooking, and singing. The strength in their song sustains them through trials on the ground and in the sky, as they wait for their loved one, a pilot, to return from war. With an author's note that pays homage to the true history of Native American U.S. service members like WWII pilot Ola Mildred "Millie" Rexroat, this is a story that reveals the roots that ground us, the dreams that help us soar, and the people and traditions that hold us up.

show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. Outliers will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Like American politics, the academic debate over justice is polarized, with almost all theories of justice falling within one of two traditions: egalitarianism and libertarianism. This book provides an alternative to the partisan standoff by focusing not on equality or liberty, but on the idea that we should give people the things that they deserve. Mulligan sets forth a theory of economic justice—meritocracy—which rests upon a desert principle and is distinctive from existing work in two ways. First, meritocracy is grounded in empirical research on how human beings think, intuitively, about justice. Research in social psychology and experimental economics reveals that people simply don't think that social goods should be distributed equally, nor do they dismiss the idea of social justice. Across ideological and cultural lines, people believe that rewards should reflect merit. Second, the book discusses hot-button political issues and makes concrete policy recommendations. These issues include anti-meritocratic bias against women and racial minorities and the United States' widening economic inequality. *Justice and the Meritocratic State* offers a new theory of justice and provides solutions to our most vexing social and economic problems. It will be of keen interest to philosophers, economists, and political theorists.
